Lung Cancer Screening
SAVES LIVES

Most people do not know they have lung cancer until it’s too late. Lung cancer screening looks for cancer in people who do not have symptoms. We find cancer in the early stages so your chances of cure are much higher.

Talk to your doctor to see if lung cancer screening is right for you.

LUNG CANCER FACTS*:

1 in 13 men and 1 in 16 women in the US will be diagnosed.

Of these men and women diagnosed with lung cancer...

- 10-15% never smoked
- about 50% used to smoke
- less than 40% currently smoke

1 in 3 people know someone who has had lung cancer.

Lung: 159,480
Prostate: 29,720
Breast: 40,030
Colon: 50,830

Lung cancer claims the lives of more people in the US each year than colon, breast & prostate cancers combined.
